Information for Contributors

Manuscripts

All material intended for publication should be submitted to the Editor at the editorial office of the Journal, P.O. Box 8650, Ottawa, Ont. K1G OG8, with a covering letter requesting consideration for publication in the Journal. Acceptance is subject to the understanding that such material is submitted solely to this Journal, and will not be reprinted without the consent of both the Editor and author. The Editor reserves the right to make such editorial changes as are considered necessary to ensure correctness of grammar, clarification of obscurities or conformity to Journal style. Articles should be typed, double-spaced, on paper 8½" x 11", and the original and one copy should be submitted. A factual abstract of 150 words should also be supplied. Manuscripts may be submitted in English or French.

Illustrations and Tables

Illustrations should be referred to as "Figures" and numbered in Arabic numerals. Each should be mounted on a separate sheet and identified by number and name of author. (Please note that photographs are damaged by writing on the back.) A list of explanatory legends for all of the figures should be typed on another sheet. Photographs should be glossy prints, untrimmed and preferably not larger than 8" wide and 10" deep. Patients must not be recognizable in photographs unless written consent has been obtained and supplied with the manuscript. The top of photographs, radiographs and photomicrographs should be indicated. Colour work can be published only at the author's expense, and reprints containing colour are much more expensive than reprints in black and white. Magnification of photomicrographs must be given. Graphs and diagrams should be drawn with India ink.

Tables should be numbered in Roman numerals. Each table should be typed on a separate sheet and an explanatory title should be supplied. The author's name should appear at the top of the page.

References

References should be limited to the minimum necessary, and authors are responsible for their accuracy. They should be checked with the original sources, designated by Arabic numerals in the text, numbered in sequence and typed double-spaced on a separate sheet in accordance with the style adopted by *The Canadian Medical Association Journal* in July 1971.

Each periodical reference should include in order: the author's name and initials in capital letters; the title of the article; abbreviated journal name; volume number, page numbers and year. The abbreviations of journal names should be those defined in the *Index Medicus* 1971, e.g. 2. ROSEN HJ: Lumbar intervertebral disc surgery: review of 300 cases. *Can Med Assoc J* 101: 317-323, 1969.

References to books should include in order: author's name and initials in capital letters; title of book; number of edition (if second or third, etc.); city of publication; name of publishing house; year of publication; page number (if a specific reference), e.g. 9. GOODMAN LS, GILMAN A: *Pharmacological Basis of Therapeutics*, third ed, New York, Macmillan, 1965, p. 925. A more complete list of requirements may be obtained from the Editor.

Subscription Rates

The Journal is published twice each month. It is supplied to paid-up members of The Canadian Medical Association as a perquisite of membership. Medical libraries, hospitals and individuals in Canada may subscribe to the Journal at \$20 per year, payable in advance. The same rate and condition apply to subscribers in the United States. Subscriptions elsewhere are available at \$25.00 per year, payable in advance. There is a special rate for undergraduates in medicine residing in Canada of \$5.00 per year. Subscriptions and all relative correspondence should be addressed to the Subscription Department, The Canadian Medical Association Journal, C.M.A. House, Box 8650, Ottawa, Ont. K1G OG8. Notification of change of address should be forwarded one month before the date on which it becomes effective.

SYNAFORM

Indications

Synaform is indicated in the treatment of skin disorders complicated by bacterial and/or fungal infections.

Dosage

Apply sparingly to affected areas two or three times daily.

Contraindications

Tuberculous lesions of the skin, herpes simplex, vaccinia and varicella — in individuals with a history of hypersensitivity to any of the components. Not for ophthalmic use.

Precautions

Should idiosyncratic or other adverse reactions develop, the agent should be discontinued and appropriate measures taken.

In pregnant patients, topical steroids should not be used extensively, in large amounts, or for prolonged periods of time.

Availability

Synaform Regular

contains fluocinolone acetonide (Synalar) 0.025% plus iodochlorhydroxyquin 3.0%. Tubes of 15 and 45 g.

Synaform Mild

contains fluocinolone acetonide (Synalar) 0.01% plus iodochlorhydroxyquin 3.0%. Tubes of 20 and 60 g.

Synaform Cream

is primarily useful for moist, weeping lesions.

Synaform Ointment

is especially useful for dry lesions.

NEO-SYNALAR

Indications

Neo-Synalar is recommended in the treatment of skin disorders complicated by bacterial infections.

Dosage

Apply sparingly to affected areas two or three times daily.

Contraindications

Tuberculous and fungal skin lesions, herpes simplex, vaccinia and varicella — in individuals with a history of hypersensitivity to any of the components. Not for ophthalmic use.

Precautions

Should idiosyncratic or other adverse reactions develop, the agent should be discontinued and appropriate measures taken.

In pregnant patients, topical steroids should not be used extensively, in large amounts, or for prolonged periods of time. If the local infection continues, or in the presence of systemic infection, appropriate systemic therapy should be considered. Prolonged use of Neo-Synalar may result in overgrowth of non-susceptible organisms.

Availability

Neo-Synalar

contains fluocinolone acetonide (Synalar) 0.025% plus neomycin (base) 0.35%. In a water-washable, vanishing cream base. Tubes of 15 and 45 g.

ALTA VISTA FUND

Dear Unitholder:

The market value of units in the Alta Vista Fund increased 7.2% during the quarter ended March 30, 1972—from \$11.06 on December 31, 1971 to \$11.86 on March 30, 1972.

It is the view of our expert consultants that stock prices are fully valued currently, relative to expected 1972 earnings. This view combined with some uneasiness in the international monetary scene and concern about inflation has resulted in a mild sell off during recent weeks. However, forecasts for 1972 anticipate continuing improvement in the economy and in corporate profits. We expect that these trends will be reflected in improved market prices later in 1972. Unit prices during the next few months should represent good opportunity for additional investment if we experience the further market improvement expected later this year.

B. E. Freamo
Executive Vice-President

C.P. 8650
1867, promenade Alta Vista
Ottawa KIG OG8, Canada
30 mars 1972

FONDS ALTA VISTA

Cher détenteur d'unités,

La valeur marchande des unités du Fonds Alta Vista a augmenté de 7.2% durant le trimestre terminé le 30 mars 1972, soit de \$11.06 le 31 décembre 1971 à \$11.86 le 30 mars 1972.

De l'avis de nos experts-conseils, le cours des actions atteint actuellement sa pleine valeur par rapport aux gains attendus en 1972. Cet avis, conjugué avec une certaine inquiétude sur la scène monétaire internationale et des préoccupations relatives à l'inflation, s'est traduit par certaines liquidations depuis quelques semaines. Cependant, d'après les prévisions de 1972, l'économie et les bénéfices des sociétés devraient continuer de s'améliorer. Nous comptons que ces tendances assurent une amélioration ultérieure des cours du marché en 1972. Le cours des unités d'ici quelques mois devraient constituer une bonne occasion d'investir davantage si nous connaissons l'amélioration que le marché devrait enregistrer dans la suite de l'année.

Le Vice-Président exécutif,
B. E. Freamo

LANCET PERFORMANCE FUND LIMITED

Dear Shareholder:

During the period January 3, 1972 to April 3, 1972 the share value of Lancet Performance Fund rose from \$8.95 to \$9.96, an increase of 11.3%.

Virtually all of the increases in the stock prices occurred during the first two months of the quarter in a continuance of the upward trend which started in November 1971. Currently the market is marking time. Junior industrials have shown some recovery during the last few months and this is the area which should show further improvement as the economy shows further real growth.

Our fund managers believe that during the last half of 1972 we shall see further improvement in the Canadian economy and in the prices of common stocks. On this basis, the price of Lancet shares during the next few months should represent an excellent investment opportunity.

B. E. Freamo
Executive Vice-President

FONDS LANCET PERFORMANCE

Cher Actionnaire,

Du 3 janvier 1972 au 3 avril 1972, la valeur des actions du Lancet Performance Fund a augmenté de \$8.95 à \$9.96, soit une avance de 11.3%.

Presque toutes les augmentations du cours des valeurs sont intervenues durant les deux premiers mois du trimestre, dans le cadre de la hausse commencée en novembre 1971. Le marché marque actuellement le pas. Les petites valeurs industrielles ont accusé une certaine reprise depuis quelques mois; il s'agit d'un secteur qui devrait accuser encore de l'amélioration à mesure que l'économie enregistrera de réels progrès encore.

D'après nos gestionnaires, le premier semestre de 1972 devrait voir une autre amélioration de l'économie canadienne et des cours des actions ordinaires. Cela étant, le prix des actions Lancet devrait constituer une excellente occasion d'investissement durant les quelques prochains mois.

Le Vice-Président exécutif,
B. E. Freamo

29 février 1972

Dear Doctor:

Attached is a statement of the investments in C.M.A.R.S.P.'s Common Stock Fund as of February 29, 1972—the end of our current fiscal year. The unit value was \$26.47 compared with \$21.40 a year ago—an increase of 23.7%. Perhaps the best way to illustrate for you how this performance compares with others is to list the comparative data for our Common Stock Fund and other mutual funds for which we maintain continuing comparisons. The tables which are set out at the bottom of this page list changes based on the bid or ex-load quotations. Allowances have been made for dividends where applicable.

In addition to this excellent performance by our Common Stock Fund, National Life's interest rates on new monies invested in our Insured Annuity Fund have continued at a high level—the four quarterly rates for the calendar year 1971 were 7.38%, 7.67%, 7.08% and 7.22%.

We believe that this performance coupled with the reduced investor costs which result because C.M.A.R.S.P. does not pay salesmen's commissions or front-end loads amply justifies your confidence in your funds.

B. E. Freamo
Executive Secretary

Le Secrétaire exécutif,
B. E. Freamo

Cher Docteur:

On trouvera en annexe un état des placements dans le Fonds d'actions ordinaires du Régime en date du 29 février 1972, soit la fin de notre présent exercice financier. La valeur unitaire était de \$26.47 contre \$21.40 il y a un an, soit une augmentation de 23.7%. La meilleure façon peut-être de vous montrer comment cette situation se compare avec d'autres est de citer les chiffres comparatifs de notre Fonds d'actions ordinaires et d'autres fonds mutuels avec lesquels nous maintenons de constantes comparaisons. Les tableaux du bas de cette page indiquent des variations fondées sur les prix offerts ou les prix après frais d'adhésion. Il est tenu compte des dividendes le cas échéant.

En plus de cette excellente situation de notre Fonds d'actions ordinaires, les taux d'intérêt de la National Life à l'égard des nouvelles sommes placées dans notre Fonds de rentes assurées sont demeurés élevés, soit 7.38%, 7.67%, 7.08% et 7.22% pour les quatre trimestres de l'année civile 1971.

A notre avis, cette situation, conjuguée avec la réduction des frais d'investissement due au fait que notre Régime ne paie pas de commissions de vendeur ni de frais d'adhésion, justifie amplement votre confiance dans vos fonds.
